

TECHNICAL SEMINAR

19 April 2023 | Perth

Event organised by the RSTA
in association with SCOTS

MANAGING SKID RESISTANCE IN SCOTLAND – THE FACTS AND THE FRICTION

**FREE
TO ATTEND**

The RSTA is the industry focus for the quality delivery of long-lasting, cost-effective and sustainable road maintenance solutions.

ABOUT THIS EVENT

The seminar will focus on how monitoring, improving and maintaining skid resistance reduces accidents and delivers skid resistance policies whilst reducing carbon. It will include a range of speakers from Transport Scotland, SCOTS, ROSPA, Zurich Insurance and the supply chain.

The seminar, aimed at roads delegates including Inspectors, technicians, engineers and managers will be chaired by Donald Morrison, Head of Asset Management & Procurement, Roads Directorate, Transport Scotland.

A similar event showed the importance of this knowledge being understood and discussed between all levels in the road service. It is hoped that many of you will be able to attend what will be an informative and useful event for road practitioners.
